## Skills and Qualifications

- Experience in Web Application Development using: Html, CSS3, ASP, Html5, Java Script, PHP, Python, GAE, WordPress, Bootstrap, GWT.
- Proficient with a variety of programming languages such as: C, C++, C#, Java, Python, Scheme, Assembly
- Six years of customer service, sales, general technical experience.

## Professional Experience

- **Development Team Leader/Business Manager CONSSOL LLC Newark DE 2013 to Present**  
As the team leader, business manager and one of the owners of CONSSOL LLC, I not only guided and supervised a 6-man team on each individual project, I was also in charge of all communications to our clients. I was involved in every aspect of the design and development process of each project. On top of these responsibilities, I also reviewed contract documents, monthly income reports and or balance sheets. I coordinated and planned all advertising and marketing campaigns. As I completed each task, I also made sure, that my team was motivated and performing their roles to the best of their abilities.
- **Php backend dev Booj Denver Colorado July 2016 - August 2016 (Laid off)**  
At Booj I was a backend developer responsible for fixing and improving client's websites that front developers could not. I programmed in PHP and SQL.
- **Tech Project Coordinator Bounce Software LLC Fort Collins, Co October 2016 February 2017(End of Contract)**  
As a project Coordinator, I worked with managers of three different companies in order to improve their current CRM. I prioritized projects based on time, customer satisfaction and overall positive impact. A part of my duties was to also provide updates on projects on a weekly basis in an organized update summary packet.

## Projects

- **Web Application Tutorsbin.com (HTML, CSS, JQUERY, MYSQL, JQL,PYTHON) 2015**  
During this project, I worked with a group of 5 programmers and 1 graphic designer. Using the agile development process my team and I were able to complete a full scheduling system for tutors and students with its own unique design. Tutor'sBin also interfaced with a third party payment system that users could use.
- **Web application for Lionsoup.com (HTML, CSS, MYSQL, PHP) Spring 2014**  
As team lead for LIONSOU.COM I not only coordinated the design and programming process of this project that spanned a period of 9 months. I aided in debugging, testing the user interface, and the physical programming of this membership website for authors and readers. This project allowed me to use all the skills I have learned so far. This project was developed using bootstrap and many other tools and was made as custom WordPress interface that allowed users to post books, purchase books, purchase memberships, for all devices.
- **Shell and Memory Allocation for University of Delaware(Eclipse: C) Spring 2014**  
During this project, I worked in a team of two over the course of 3 months to develop a UNIX based shell. This shell was able to do basic shell commands like Dir, Echo, basic coding logic, etc. Along with

the shell a Dispatcher that used Memory Allocation Algorithms first-fit, best-fit worst-fit. This Dispatcher dispatched processes based on their size and importance to Operating System.

- **Web application for 1 Software Place (HTML,HTML5,CSS3,JAVASCRIPT,PYTHON) Fall 2013**

Coordinated a 5-man team to develop the web application for 1 Software Place. Planned and developed a database that integrated with a mobile compatible website that facilitates the communication between company and the clients. The application can keep track of each individual client's project information, reports, and bugs as well as allow the clients to see their project being developed in real time.

- **Mobile compatible website for Introspect Care (JQUERY MOBILE) Fall 2013**

Introspect care is a mental health practice located in Pennsylvania. Over the course of a month I coordinated a 3-man team through the development of a new website with mobile compatibility.

#### **Other Experience**
